

# Quality and value in Garden Sheds.

## Three finishes - One quality shed. *You decide!*

When you choose one of our sheds you get a choice of three finishes.

**The Rustic** finish combines rural charm with lasting quality. The sheeting on this shed has a sawn finish and is overlapped (as slates on a roof). The roof boards and flooring boards are butt jointed ie. edge to edge.

**The Glenealy** is made with tongue and grooved boards creating an elegant, smooth finish. The sheeting used around this shed is kiln dried throughout with a planed smooth finish and shiplap jointed. Roof and flooring boards are tongue and grooved.

**Pressure Treated (Barrel Board)**. We regard this Garden Shed as the best on the Irish market today! All the exterior timber used around this shed is pressure treated spruce. The timber is moulded into a barrel shape giving the shed a log effect. (Find below a more detailed description of the Rustic, Glenealy and Pressure Treated (Barrel Board) finishes.)

PROVEN VALUE

### Rustic Finish Sheds

Wicklow craftsmanship and the best native timber come together to produce garden sheds which combine rustic charm and lasting qualities. The Rustic Shed is in our opinion a far stronger shed than any other garden shed of a similar price. The Rustic has the following features:

- Sheeting used in manufacture has an unplanned finish
- Sheeting used on exterior is overlapped (as slated on roof).
- The roof and flooring boards are butt jointed edge to edge.
- Weatherproof window fitted with Perspex.
- Heavy duty mineralised felt.
- Extra heavy framework.
- Door, Shiplapped timber used, not laths to cover joints as on other sheds.
- Exterior treated with wood preservative.
- Available in all sizes and styles.

KILN DRIED TIMBER

### Glenealy Finish Sheds

Our Glenealy Shed range is manufactured from Kiln Dried Timber, sheeting all around is planed finish shiplap jointed. Roof and flooring boards are tongued and grooved. Complete with double window. Features include:

- 6"x1" (150mm x 22mm) PAO tongued and grooved roofing and floor boards.
- Heavy duty mineralised felt.
- Exterior 6"x1" (150mm x 22mm) PAO weather sheeting.
- Weatherproof window fitted with Perspex.
- Door 6"x1" (150mm x 22mm) is shiplapped timber (not laths to cover joints as on other sheds), tongued and grooved, battened and braced and can be locked with a simple padlock.
- Door wider and higher for simple access.

- Exterior treated with wood preservative.
- Available in all size and styles.

PRESSURE TREATED

### Pressure Treated (Barrel Board Finish) Sheds

All the exterior timber used around this shed is pressure treated spruce, a very durable timber which we sourced from Scandinavia. The timber is moulded into a barrel shape giving the shed a log effect. All the side boards are shiplap jointed, while the roof and floor boards are kiln dried tongued and grooved. Features include:

- 6" X 1" (150mm X 22mm) PAO tongued & grooved roofing & floor boards.
- Heavy duty mineralised felt.
- Exterior 5" X 1" (125mm X 22mm) PAO barrel board weather sheeting.
- Weatherproof window fitted with perspex.
- Door higher and wider for simple access.
- Complete with double window in 8' sheds & longer
- Planed barrel board log effect
- White Spruce is a slow growing 1st grade timber, ideal for Irish weather conditions, and is exceptionally durable.
- Available in all sizes and styles.
